## BUSINESS RELATIONSHIP

Archer first partnered with Munich Re Automation Solutions (MRAS) in 2021 to support them with a number of key .Net and JavaScript software engineering hires. In early 2022, we embarked upon an urgent project to build a new team to support the development of an application that was being transferred to Dublin from another location. Timelines were tight, so we agreed on an interview process and ways of working that enable us to secure high-calibre candidates quickly. The result of this resulted in us placing 9 candidates with MRAS in a 6-week period.

Archer has since continued to partner closely with MRAS to support them on critical, hard-to-fill IT hires in Dublin.

## HIRING OVERVIEW

- .Net Technical Lead
- 5x .Net Software Engineers
- 1x PowerBI Developer
- 1x Angular Developer
- 1x Automation QA Engineer

## THE OUTCOME:

## CLIENT FEEDBACK

Archer is our trusted partner across our day-to-day, difficult-to-fill, niche, and executive-level technology roles and always performs to the highest of standards. I am consistently surprised, not only by the quality of the candidates they supply but the professionalism demonstrated by the

consultants and their vast range of market knowledge. With any vacancy they engage with us on, it's evident that they take the time to get to know their candidates, are true to the needs of the roles advertised, and build up strong connections with our hiring managers & TA staff alike. Their scope of the market is vast and we often engage with them on an exclusive basis as it is evident they have close ties to key connections in their respective industries.

We've hired a large number of candidates through Archer and they have certainly contributed to making the company successful by helping us to build a solid workforce. Without any hesitation, I would recommend them as a staffing solutions option to any company and would have the utmost confidence they can help to meet any crucial recruitment needs.
