BUSINESS RELATIONSHIP

Archer first partnered with Eaton in 2024 to support the team with a critical Director level role in IT. Since then, we have collaborated with them on Niche, highly critical Senior Level/Leadership or Executive level roles.

CLIENT FEEDBACK

Working with Archer has been an outstanding experience for Eaton. They have successfully filled critical senior roles, demonstrating their expertise in targeting the passive market and engaging top-tier talent. From the beginning, Archer committed to working closely with us, providing a highly tailored and strategic approach to our recruitment needs.

Most recently, we partnered with Archer to fill a Senior Director position that had remained open for several months. Their team not only advised us on job titles and specifications but, within just one week, presented several close fits and two perfectly matched candidates—both so strong that we struggled to choose between them.

Archer has consistently excelled in addressing these recruitment challenges and has been instrumental in supporting our senior technology hiring efforts. Our partnership stands out for two key reasons. First, they are unwavering in their commitments and consistently deliver on their promises, particularly with timelines. Second, their ability to provide a highly impressive pipeline of niche Senior/Executive candidates that perfectly matched our requirements.

They were proactive, enthusiastic, and genuinely invested in our success. Their responsiveness and prompt follow-ups stood out. I would happily recommend Archer to any company seeking to hire Director or Executive-level IT professionals.

We highly value our collaboration with Archer and look forward to continuing our successful partnership.

Daniar Ramankulov – Executive Talent Acquisition Manager
